INTRODUCTION

The Resume Website with CSS Styling is a responsive, web-based digital curriculum vitae developed using semantic HTML5 and vanilla CSS3. Designed as a lightweight, clean, and accessible alternative to traditional PDF or paper resumes, the project showcases academic credentials, professional experience, technical competencies, and project deliverables within a structured online environment.

By leveraging native CSS Grid layouts for multi-card project showcases, CSS multi-column rules for skill categorization, and granular media queries (@media), the platform achieves seamless cross-device adaptability from mobile displays to wide desktop monitors. It also incorporates dedicated print stylesheets (@media print) to preserve formatting during physical document generation. This implementation illustrates how fundamental front-end design systems, semantic page structuring (<header>, <section>, <article>), and responsive layout engines can modernise career portfolios without relying on heavy external libraries or frameworks.

INPUT CODE

```
<!doctype html>
<html lang="en">
<head>
<meta charset="UTF-8" />
<meta name="viewport" content="width=device-width, initial-scale=1" />
<title>Shaurya Venkta - Resume</title>
<style>
* {
box-sizing: border-box;
}
body {
max-width: 900px;
margin: 30px auto;
padding: 30px 45px;
border-top: 4px solid #24527a;
color: #222;
font: 16px/1.5 Arial;
}
header {
border-bottom: 1px solid #d7dfe5;
padding-bottom: 18px;
}
h1,
h2 {
color: #24527a;
}
h1 {
margin: 0;
font-size: 34px;
}
h2 {
```

```
margin: 26px 0 8px;
border-bottom: 2px solid #24527a;
font-size: 21px;
}
h3 {
margin-bottom: 0;
font-size: 17px;
}
p {
margin: 8px 0;
}
a {
color: #24527a;
}
ul {
padding-left: 22px;
}
.links a {
margin-right: 18px;
font-weight: bold;
}
.skills {
columns: 2;
}
.date {
color: #666;
font-size: 14px;
}
.projects {
display: grid;
grid-template-columns: repeat(3, 1fr);
gap: 18px;
}
.project p {
color: #555;
font-size: 14px;
}
```

```

table {
width: 100%;
border-collapse: collapse;
}
th,
td {
border: 1px solid #ccd6dd;
padding: 9px;
text-align: left;
}
th {
background: #eef4f8;
color: #24527a;
}
footer {
margin-top: 30px;
border-top: 1px solid #d7dfe5;
color: #666;
font-size: 14px;
}
@media (max-width: 650px) {
body {
margin: 0;
padding: 24px 20px;

About Me

I am studying BCA at SDJ International College. I practise frontend development, Node.js, Python, and small data projects.

Career Objective

I am looking for an internship or entry-level opportunity where I can improve my development skills and contribute to real projects.

Skills

- HTML and CSS
- JavaScript
- React JS
- Node JS and Express
- MongoDB
- Python
- Git and GitHub
- Basic machine learning

Work Experience

Software Intern - XYZ Tech Solutions

June 2025 - December 2025

- Worked on REST APIs using Node.js and MongoDB.
- Helped add data processing and visualization features.

Research Assistant - SDJ International College

January 2024 - May 2025

- Used Python and FFT techniques for time-series analysis.
- Kept notes and documentation for the work completed.

Work Experience

Software Intern - XYZ Tech Solutions

June 2025 - December 2025

- Worked on REST APIs using Node.js and MongoDB.
- Helped add data processing and visualization features.

Research Assistant - SDJ International College

January 2024 - May 2025

- Used Python and FFT techniques for time-series analysis.
- Kept notes and documentation for the work completed.

Education

College	Course	Result	Year
SDJ International College	BCA	7.7 CGPA / 85%	2026

Projects

FFT-based Signal Analyzer

A Flask project that reads CSV files and shows time-domain and frequency-domain graphs.

[GitHub](#)

Real-time Chat App

A chat application made with React, Node.js, MongoDB, and WebSockets.

[GitHub](#)

Personal Portfolio

A small HTML, CSS, and JavaScript website for displaying projects and contact details.

[GitHub](#)

Achievements

- Completed a BCA project based on FFT and signal analysis.
- Practised full-stack development through personal projects.

Certifications

- Machine Learning - Coursera
- Deep Learning Specialization - Coursera
- Full Stack Web Development with React - Coursera
- Data Structures and Algorithms - HackerRank

January 2024 - May 2025

- Used Python and FFT techniques for time-series analysis.
- Kept notes and documentation for the work completed.

CONCLUSION

The Resume Website with CSS Styling project successfully demonstrates the implementation of a clean, lightweight, and structured digital curriculum vitae using semantic HTML5 and vanilla CSS3. By adopting native web standards, the project achieves an optimal balance between visual hierarchy, accessibility, and high performance—eliminating the need for third-party frameworks or heavy script dependencies.

The styling methodology illustrates the practical power of modern layout engines: CSS Grid ensures rigid yet responsive project showcase alignment, multi-column properties organize technical competencies neatly, and fine-tuned media queries guarantee fluid transitions between mobile viewports and desktop resolutions. Additionally, the integration of dedicated print rules preserves the integrity of the document for formal physical outputs.

Ultimately, this project highlights how fundamental front-end design techniques can transform a standard resume into an interactive, cross-device web asset that effectively communicates technical credentials, academic background, and professional readiness.
