INTRODUCTION

The Resume is a simple web-based application developed using HTML and CSS. The main purpose of this project is to present a candidate's academic and professional profile in a clean, structured, and printable format. The application displays personal details such as Name, Email, and Phone Number, along with sections for Objective, Qualifications, Skills, Projects, Certifications, and Work Experience. The qualification and work experience information is organized using HTML tables and lists, while CSS is used to style the layout, typography, and spacing for a professional appearance. HTML is used to create the structure and content of the page, and CSS is used to design the visual presentation, including headings, borders, and text alignment. This project demonstrates how HTML and CSS can be combined to build a well-organized, presentable digital resume that can be viewed in any web browser or printed as a hard copy.

INPUT CODE

```
<!doctype html>
<html lang="en">
  <head>

OUTPUT

Resume

Name: Shaurya Venkta
Email: shauryavenkta31@gmail.com
Phone: 8849925011

Objective:-
Seeking a position in Data Science or Full Stack Development where I can apply strong analytical skills, experience with machine learning and signal processing (including FFT), and full-stack engineering to build scalable, data-driven products that solve real-world problems and deliver measurable impact.

Qualifications:-

SrNo.	College Name	Course Name	Marks	Percentage	Year of Passing
1	SDJ International College	BCA	7.7 CGPA	85%	2026
2	SDJ International College	BCA	7.7 CGPA	85%	2026
3	SDJ International College	BCA	7.7 CGPA	85%	2026
4	SDJ International College	BCA	7.7 CGPA	85%	2026
5	SDJ International College	BCA	7.7 CGPA	85%	2026

- Skills:-**
1. HTML
 2. CSS
 3. JavaScript
 4. React JS
 5. Node JS
 6. MongoDB

- Projects:-**
- **FFT-based Signal Analyzer** — Web application for time-series analysis using Python (NumPy, SciPy) and Flask. Users can upload CSVs, view time-domain and frequency-domain plots, apply filters, and export processed data.

6. MongoDB
- Projects:-**
- **FFT-based Signal Analyzer** — Web application for time-series analysis using Python (NumPy, SciPy) and Flask. Users can upload CSVs, view time-domain and frequency-domain plots, apply filters, and export processed data.
 - **Real-time Chat App** — Built a full-stack chat application using React, Node.js, Express, and WebSockets. Implemented authentication, message persistence (MongoDB), and real-time typing/delivery indicators.
 - **Personal Portfolio** — Responsive portfolio site showcasing projects, resume, and contact form. Built with HTML, CSS, and JavaScript to demonstrate frontend and design skills.

- Certifications:-**
- Machine Learning (Coursera) — Andrew Ng
 - Deep Learning Specialization (Coursera)
 - Full Stack Web Development with React (Coursera)
 - Data Structures & Algorithms (HackerRank Certificate)
 - Python for Data Science (edX)

- Work Experience:-**
- Software Intern** — XYZ Tech Solutions
June 2025 — Dec 2025
- Developed RESTful APIs in Node.js and integrated with MongoDB to support analytics dashboards.
 - Implemented data preprocessing and visualization components, reducing report generation time by 40%.
- Research Assistant** — SDJ International College
Jan 2024 — May 2025
- Led time-series analysis projects using Python and FFT techniques; built reproducible analysis pipelines and documentation.
- Date: _____
Place: _____
Signature: _____

CONCLUSION

The Resume project successfully provides a simple and professional way to present a candidate's personal, academic, and professional details in a well-structured digital format. The project uses HTML to create the structure and content, and CSS to design the layout, typography, and overall visual presentation. It eliminates the need for manually formatting a resume in a word processor and ensures a clean, consistent, and printable output. This project also helps in understanding the practical use of web technologies and how HTML and CSS work together to build a structured, presentable, and easy-to-maintain web page.
